

*Experience a partnership with Coastal Concepting to add to your resources for securing more projects*

## ***About Coastal Concepting***

Coastal Concepting has over 30 years of experience in automated assembly and packaging line design & implementation, from initial concept, costing & proposals, through engineering, project management, installation and startup, as well as ongoing support.

*Our approach combines standard and custom elements in a way that delivers a system concept with a short turnaround time, as well as better reliability, serviceability, lower project risk, and lower cost*

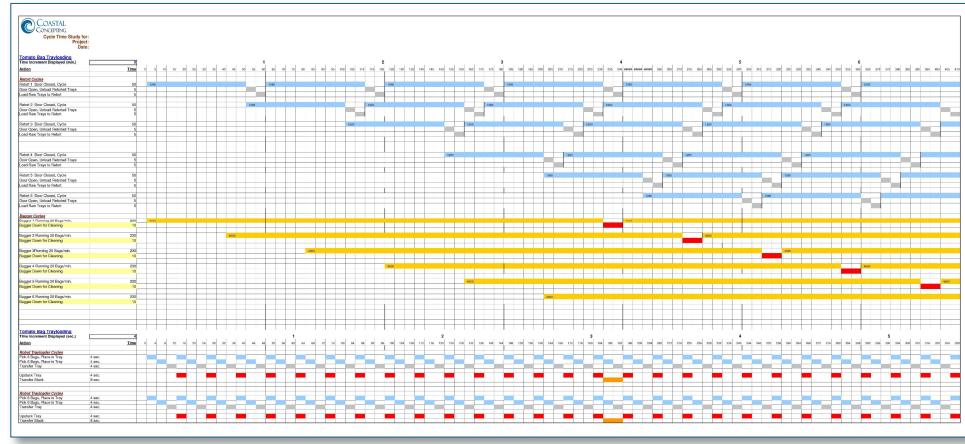

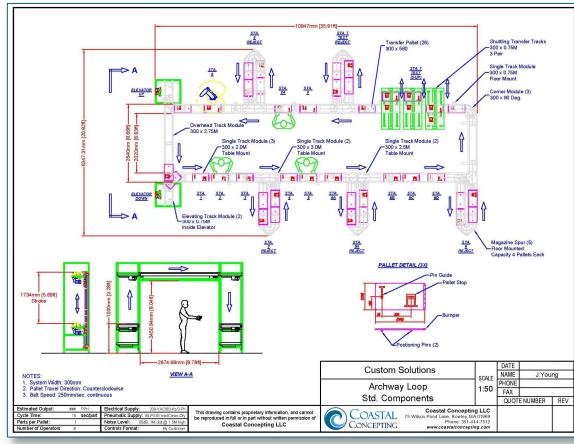

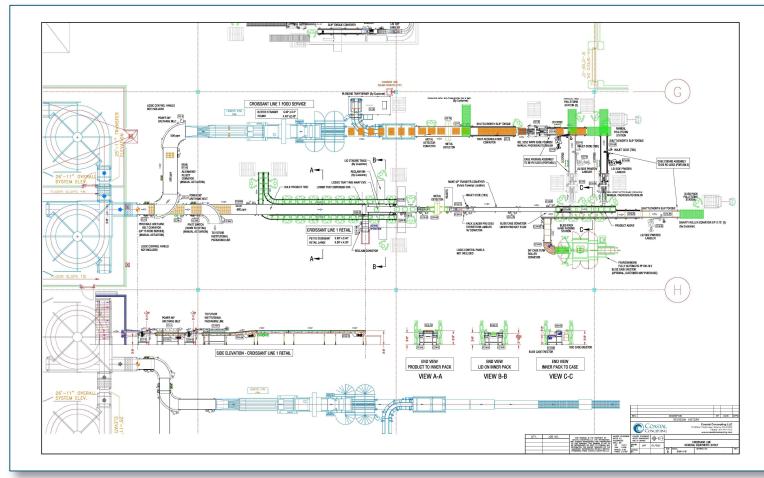

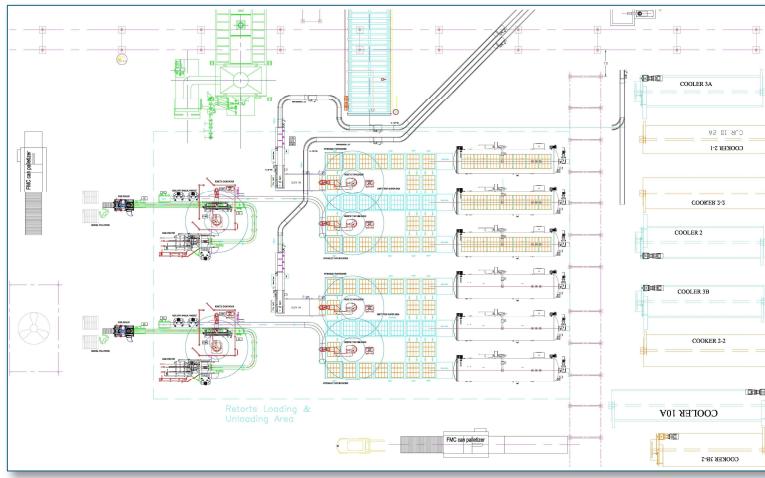

## *Benefits*

- Supplement your Applications or Concepting Department with extra help only when you need it by enlisting Coastal Concepting
- No need to hire more full-time employees, only to wonder what to do with them in the off-peak times
- Our industry experience will augment your own

## ***Industries Served***

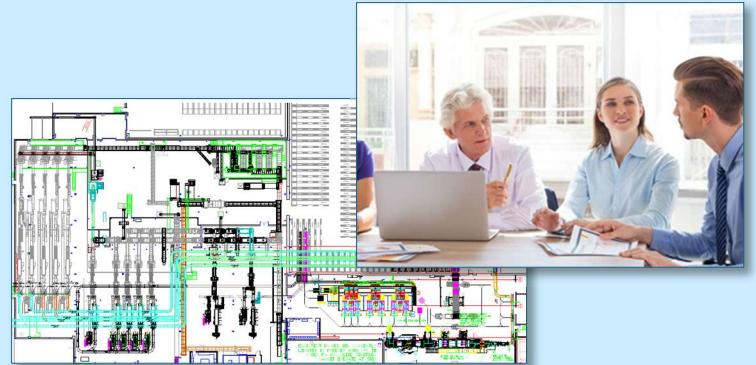

- Automotive component assembly
- Medical device assembly & packaging
- Food & beverage handling
- Warehouse / distribution center material handling automation
- Conventional & robotic systems

## Services:

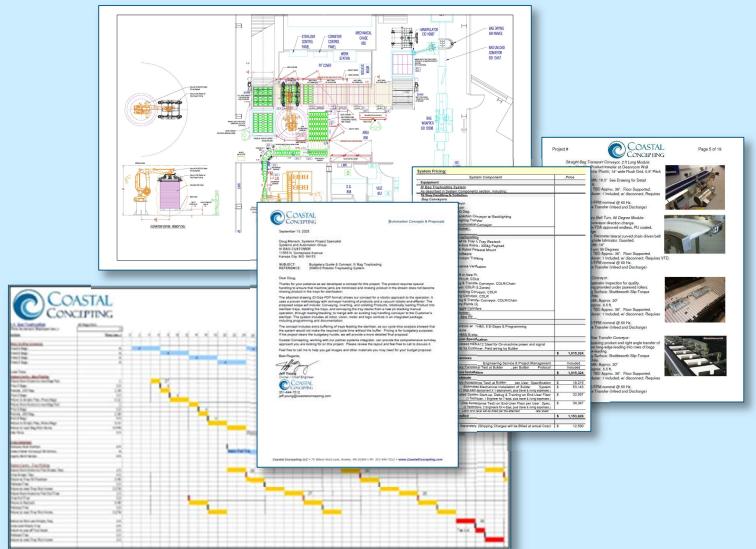

### **Front End**

Coastal Concepting provides front-end design services, starting at the point you need us: site survey, problem definition, automation goals, building measurements w/ existing equipment.

### **Concepting**

From there, we can provide proposed line concept drawings in AutoCAD 2D, including elevations (solid renderings, if needed), cycle-time analysis, equipment costing & proposal. If you have an RFP already, we can save a few steps and provide quick turn-around concepts/proposals to make your project a reality.

### **Project Execution**

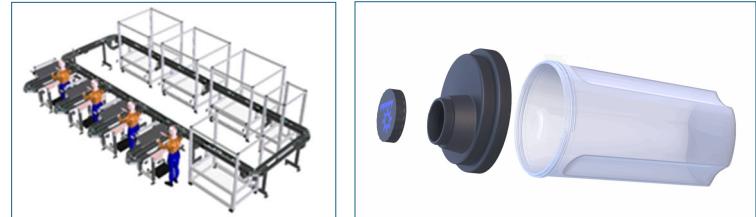

We can provide project management and will partner with specific suppliers, machine builders or integrators for project execution, installation and startup.

### **Other Services**

We also have partners for services related to:

- Product design, feasibility
- Solid modeling
- Technical Writing & Documentation
