

About Coastal Concepting

A man with glasses and a beard, wearing a light blue button-down shirt, is seated in a black office chair at a desk. He is looking at a large monitor on the left which displays a complex network diagram. To his right, another monitor shows a document with images. Further right, a third monitor displays a line graph. A laptop is also open on the desk to the right. On the desk, there is a black mouse, a keyboard, a blue mug, and a small black device. In the background, a shelf holds books and a round clock. A large window behind him shows a view of green trees outside.

Benefits

- ## Industries Served

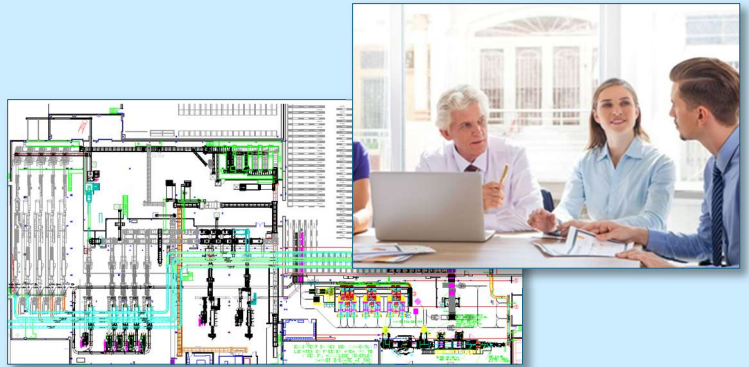

- Automotive component assembly
- Medical device assembly & packaging
- Food & beverage handling
- Warehouse / distribution center material handling automation
- Conventional & robotic systems

Services:

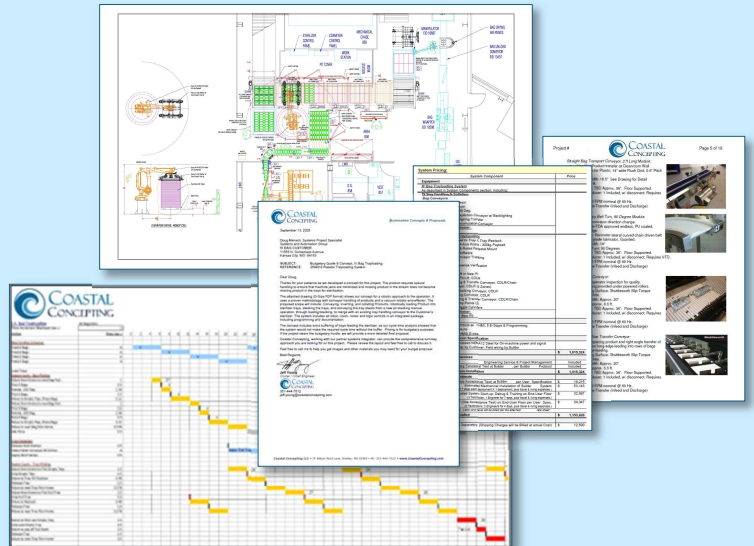

Front End

Coastal Concepting provides front-end design services, starting at the point you need us: site survey, problem definition, automation goals, building measurements w/ existing equipment.

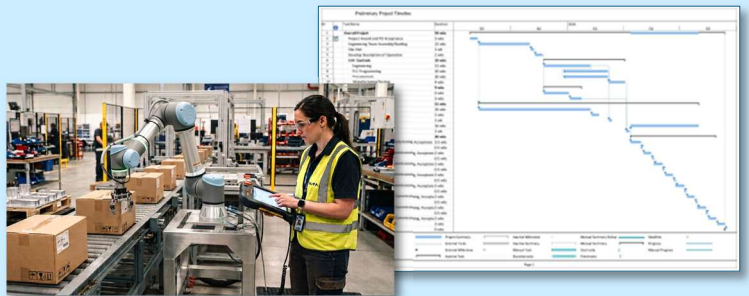

Concepting

From there, we can provide proposed line concept drawings in AutoCAD 2D, including elevations (solid renderings, if needed), cycle-time analysis, equipment costing & proposal. If you have an RFP already, we can save a few steps and provide quick turn-around concepts/proposals to make your project a reality.

Project Execution

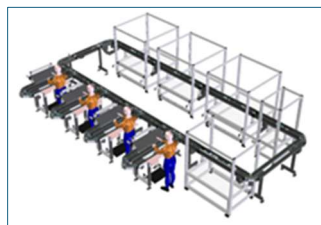

We can provide project management and will partner with specific suppliers, machine builders or integrators for project execution, installation and startup.

Other Services

We also have partners for services related to:

- Product design, feasibility
- Solid modeling
- Technical Writing & Documentation
